Eddie Schwalb

April 2004 **Computers in Entertainment (CIE)**, Volume 2 Issue 2

Publisher: ACM Press

Full text available: pdf(335.60 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Interactive television (iTV) is an evolutionary merging of digital TV and the internet. iTV technology offers new powerful ways for consumers to interact with content and service providers. In Europe, iTV has gained significant traction during the turn of the century. For example, about 500,000 viewers signed up for SkyDigital's email service during 2000. In another example, Nickelodeon's "Watch Your Own Week" voting application was available to SkyDigital viewers during Oct 22-27 2001. While on ...

Full text available: pdf(925.68 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

MPEG-4 is an ISO/IEC standard developed by MPEG and promises to be a revolutionary force in the multimedia market. MPEG-4 allows multimedia authors to create interactive multimedia content that can be streamed at variable bit rates over high and low bandwidth connections. The standard has the potential to bring interactive multimedia to a larger audience, for instance providing interactive television or streaming video to a cell phone. Any multimedia technology will only be successful if it is a ...

Joshua J. Cogliati, Frances W. Goosey, Michael T. Grinder, Bradley A. Pascoe, Rockford J. ROSS, Cheston J. Williams

 June 2005 **Journal on Educational Resources in Computing (JERIC)**, Volume 5 Issue 2

Publisher: ACM Press

 Full text available: [pdf\(2.02 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Progress on a hypertextbook on the theory of computing is presented. The hypertextbook is a novel teaching and learning resource built around web technologies that incorporates text, sound, pictures, illustrations, slide shows, video clips, and---most importantly---active learning models of the key concepts of the theory of computing into an integrated resource. Active learning models currently exist for finite state automata, regular expressions, regular grammars, the pumping lemma for regular ...

Simon Byers, Lorrie Cranor, Dave Korman, Patrick McDaniel, Eric Cronin

October 2003 **Proceedings of the 3rd ACM workshop on Digital rights management****DRM '03****Publisher:** ACM PressFull text available: [pdf\(285.80 KB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Unauthorized copying of movies is a major concern for the motion picture industry. While unauthorized copies of movies have been distributed via portable physical media for some time, low-cost, high-bandwidth Internet connections and peer-to-peer file sharing networks provide highly efficient distribution media. Many movies are showing up on file sharing networks shortly after, and in some cases prior to, theatrical release. It has been argued that the availability of unauthorized copies directl ...
